

Kerosene and Diesel Pump Peripheral Equipment

For Kerosene,
Diesel

Measure · Stop · Control !
Ideal product lineup for refueling

Metered Pump System CUBE-56 Series

Metered kerosene & diesel
dispensing with auto-stop

100V

Wall-mounted Type
CUBE-56K

Transfer kerosene from drums to poly tank
Measure usage and auto-stop when full

Issue

- ❑ Workers may use fuel wastefully without monitoring
- ❑ Fuel may overflow when the tank is full
- ❑ Nozzle storage is a problem after pump use

Improvement

No more spills when transferring to poly tank.

Less labor, eco-friendly and cost-cutting

Preset & PC management functions
Metered Pump System

CUBE-70K

Auto-stop at set volume
High capacity 70L/min

100V

*PC management function is optional

Integrated Flow Meter Electric Drum Pump TDP1K24-ATN

Customizable for your application

100V

Ready to use
straight out of the box!

Compact flow meter
TB-K24-FM

Large flow meter
MK33-25D

Auto-stop gun nozzle
ATNH-20

With rising liquid transfer costs from crude oil prices,
aim to cut expenses and streamline record keeping

Issue

- ❑ May overflow when full
- ❑ Workers may use fuel wastefully without monitoring
- ❑ Simple pumps break down frequently

Improvement

**Reduce costs by closely monitoring usage.
Boost work efficiency with a high-performance pump.**

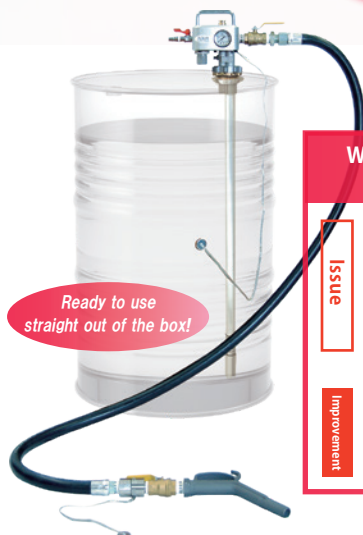

Time-saving, less labour and safe

Air-operated Pressure Pump **APD-20G**

Air

*Dispenses kerosene & diesel
with minimal waste*

Ready to use
straight out of the box!

When dispensing small amounts
from drum residues

Issue

- ❑ Explosion-proof motor pumps are costly
- ❑ Residual liquid remains in drums
- ❑ Maintenance is labor-intensive
- ❑ Manual work is dangerous and strenuous
- ❑ Fuel handling is hazardous

Improvement

Safely portion fuel.
Dispense liquid from the can without waste.
Time-saving, less labour and safe

Air-operated Diaphragm Pump **DF6D-20G**

Air

*Transfer viscous & flammable liquids
to high or distant locations*

Ready to use
straight out of the box!

Multiple daily oil portions from drums

Issue

- ❑ Electric pumps cannot operate continuously
- ❑ Pump installation/removal is troublesome

Improvement

Continuous operation without time limits
No need to seal drums and
easy pump transfer.
Time-saving, eco-friendly and cost-cutting

Hand Rotary Pump **HF-1000**

Manual

*High output:
1L per revolution*

Ready to use
straight out of the box!

Fuel supply for emergencies

Issue

- ❑ No power during disasters/emergencies
- ❑ Cannot use electricity during power outages

Improvement

Stored as emergency disaster supplies.
Useful for fuel supply when power is
unavailable due to natural disasters.
Time-saving, less labour and safe

Electric Handy Pump **EVPD56-100**

100V

*High-speed fuel transfer
Max flow 46L/min*

Ready to use
straight out of the box!

Auto-stop function
to transfer up to 10m

Issue

- ❑ May overflow when full
- ❑ Transfer limited to less than 10m

Improvement

**With a 10m hose, auto-stop
prevents overflow even
when filling up 10m away.**
Time-saving, eco-friendly and cost-cutting
